

Solutions for wine making

Natur'Fine

Preparation of specific inactivated yeast

Natural fining of fine wines.

Natur'Fine is the 100% natural fining agent dedicated to qualitative red wine. Natur'Fine is a *Saccharomyces* yeast product for clarification, colour stabilization and taste improvement of red wines.

OENOLOGICAL INTEREST

> Wine clarification reducing wine wastes (goal turbidity < 3NTU)

> Color stabilization (goal Δ NTU < 10)

Solutions for wine making

> Filterability improvement

> Taste improvement removing bad tannins and getting roundness.

ADVICE FOR USAGE

> 5 à 40 g/hL (maximum legal dosage in Europe 40g/hL)

The dosage will be defined following the advice of your consultant or after fining tests in laboratory.

USAGE

> Dissolve Natur'Fine in 5 to 10 times its weight in water. Then, incorporate the mix during pump over for tank or stirring for barrels.

PACKAGING

> 1kg bag in 10kg box.

STORAGE

> Storage: store in original, sealed packaging in a cool and dry place. Use quickly after opening.
